The Fair Credit Reporting Act (1970) and the Driver Privacy Protection Act (1994) regulates the use of driving records. Employers should still obtain an individual's driving record (MVR) prior to hiring and prior to promotion to a position as a driver. **We do not order driving records and we cannot review or give advice on records.** However, it is important that you keep the list of drivers current of your commercial auto policy. We can send a list of current drivers upon request. Please note that some policies require that drivers be endorsed to the policy so that coverage may be provided.
